

Wickr RAM

Partnered with

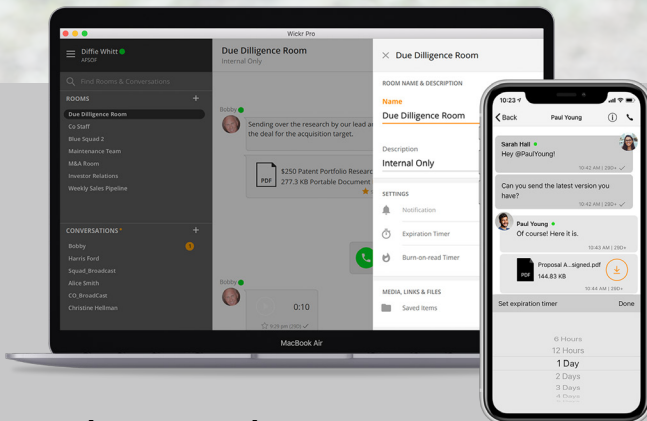

GDIT

Built for Security. Designed for the Warfighter.

Why Wickr RAM?

- ✓ Only Wickr RAM gives you access to your NIPRNet environment on your mobile device - securely and approved by the DOD
- ✓ Accessible from personal and government issued devices
- ✓ End-to-end encrypted application
- ✓ Built on a Zero Trust Network with FIPS 140-2 certification
- ✓ Fully accredited DoD ATO at IL4 FOUO w/PII & PHI (without a waiver)
- ✓ Approved for all FOUO/PII/PHI data
- ✓ DoD Validated Secure Mobile App

Wickr RAM in the DoD

- ✓ SBIR Phase 3 IDIQ from U.S. Air Force with a \$35M annual ceiling
- ✓ Fully funded deployment with multiple Major Commands participating to serve mission based requirements
- ✓ 100,000+ Users
- ✓ Created to scale to handle millions of users

Our main concern is keeping you safe and protecting your privacy. Whether on your government issued device or your personal mobile device - our unmatched security standards remain the same. We can't see your data, and neither can your adversaries - ensuring your safety and privacy downrange and at your desk, anywhere in the world.

Today, Wickr RAM is the only DoD accredited full suite collaboration tool for text, video, voice and group chat available for CUI data including FOUO/PII/PHI that can be used on any device - personal or government issued, mobile or desktop device.

Wickr RAM is not only for use on NIPRNet (SOFNET-U), in fact you can easily install it on your personal phones and computers. Wickr is the only approved solution that allows your government computer to talk to users outside the VPN. The server is approved for use on a government approved cloud provider Amazon Web Services (AWS).

Onboarding is free and easy. Get started at: wickr.com/ram/get-started
