

# // WICKR ENTERPRISE

## Security // Collaboration // Compliance

**Wickr Enterprise** is a compliance-ready, fully-customizable, self-hosted platform for secure communication across your entire organization. Wickr's secure communications products are built to transform how organizations protect high-value sensitive communications & files internally and with external partners. Sensitive communications are always protected, deleted when not needed and only saved for compliance requirements. You're always in control with Wickr Enterprise.

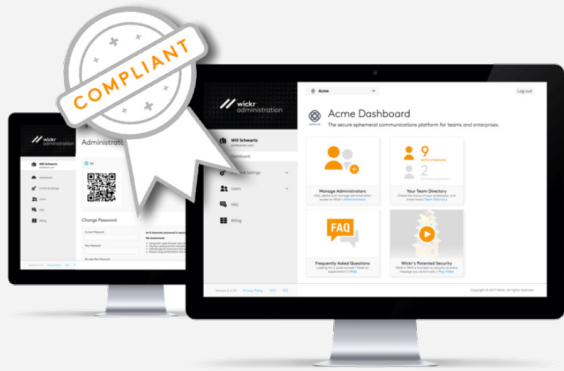

**“Wickr allows companies and organizations to bring the security and privacy of a face-to-face conversation to digital collaboration.”**

— *Thomas Tull, CEO of Tull Investment Group & Founder of Legendary Entertainment*

## Wickr Enterprise In-Depth Features

- ✔ **Ephemerality:** Wickr allows for a configurable ephemerality to ensure that no sensitive information is accessible beyond its useful life and intended recipients.
- ✔ **Rapid Deployment & On-boarding:** Wickr can be rapidly deployed in a self-hosted manner whether within our own data center or a public or private Cloud environment. Team members can create and deploy secure private networks in minutes.
- ✔ **Secure Voice & Video Calls:** Message and place secure voice & video calls 1:1 and in groups on mobile and desktop.
- ✔ **Group Collaboration:** Quickly add and verify new users & groups — security team members, executive staff, legal, PR, and outside experts. Streamline your efforts by sharing information and files of any size in one place.
- ✔ **Targeted Compliance:** While most working-level communications should never be stored for security purposes, some information must be maintained for FOIA, e-discovery & auditing purposes. Wickr Enterprise allows organizations to selectively log communication sessions to a secure customer defined data store, when required.

# WICKR ENTERPRISE

With today's state of end-point security, it is essential to run sensitive operations on a vetted secure channel, minimizing a chance for discovery by an adversary.

Wickr Enterprise is built as a hardened security environment to mitigate these risks, mirroring the expectations of a face-to-face meeting among trusted parties.
