

WICKR IO

Secure, Connect, Automate. Everything.

Wickr is the world's most secure communication platform designed to protect your organization's most important conversations. WickrIO is our integration capability that works seamlessly with your everyday business workflows and takes advantage of our industry-leading end to end encryption, ephemerality and data retention capabilities.

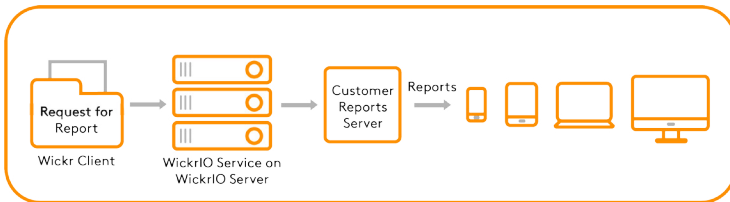

TRUSTED BY MILLIONS OF USERS WORLDWIDE TO PROTECT PRIVATE COMMUNICATIONS

WickrIO connections for third party platform integrations (such as Slack®, Zendesk®, Pagerduty®, Git, etc), broadcast messaging, or other custom business operation functions. Using Wickr Pro and Enterprise apps, your integrated workflow communications are encrypted and only designated Wickr recipients can access it.

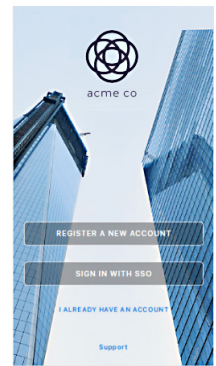

✓ **Flexible BOT Integrations:** Connecting your workflows and applications to Wickr has never been easier. The WickrIO BOT uses the Hubot framework so you can take advantage of 1,000's of Hubot integrations or custom-build and commit your own.

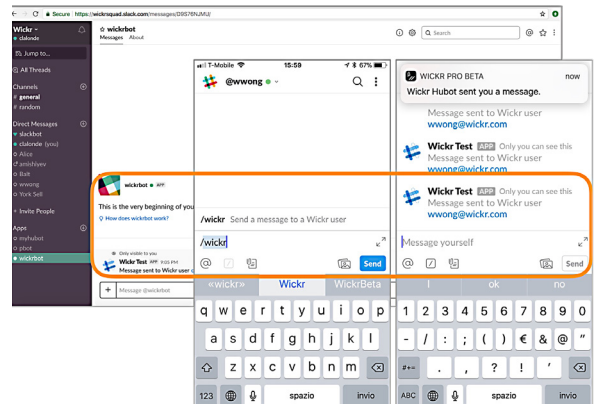

✓ **Bespoke integrations:** With WickrIO API, you can quickly integrate your business processes into a secure & ephemeral place to share content, such as posting sensitive documents. Wickr provides a standard set of API calls to create messages, rooms, and sending information to a user or group of users.

✓ **SDK & White label – Deep integrations powered by Wickr:** WickrIO SDK allows you to take advantage of the many years of Wickr experience in cryptology protocols and know-how to integrate with your proprietary and branded solutions with which your users have familiarity and comfort.

✓ **Slack - Take sensitive conversations to Wickr:** WickrIO BOT integrates with Slack – provides an easy to access function when communicating sensitive information; simply "/wickr", "/createconv", "/createroom" and add user(s).

About Wickr: Wickr, headquartered in San Francisco, is a secure communications company with a mission to transform the way companies and organizations manage corporate data retention policies and protect critical communications.
